- Combined ocean/air transport
- Efficient transit times
- Optimized costs

## Twice as fast as ocean freight and only half the price of air shipment.

For shipments from Asia, the rule of thumb is: air shipment is quick, but ocean shipment is inexpensive. DB SCHENKER*skybridge* combines the advantages of both ocean and air freight. This reduces transit times or freight costs... by up to 50%.

### Air shipment? Or ocean freight? Or both!

Especially when deadlines are tight, you must choose efficient logistics:

- If speed is what you want, then you're certain to choose air freight.  
**But air freight has its price. You pay for every kilo.**
- If your primary focus is on costs, then you're certain to choose ocean freight for heavy loads or large volumes.  
**But ocean freight takes time.**
