

Long goods – now clearly defined!

We would like to inform you about our new validation standards for long goods in system freight. We have defined two types of goods with exact lengths, widths, heights and gross weights for you. This allows you to easily classify long good shipments. A clear information chart on the back shows you all the specifications at a glance.

i **Handling long goods is a complex process.** Therefore we have to charge you an appropriate surcharge in addition to the standard fee.

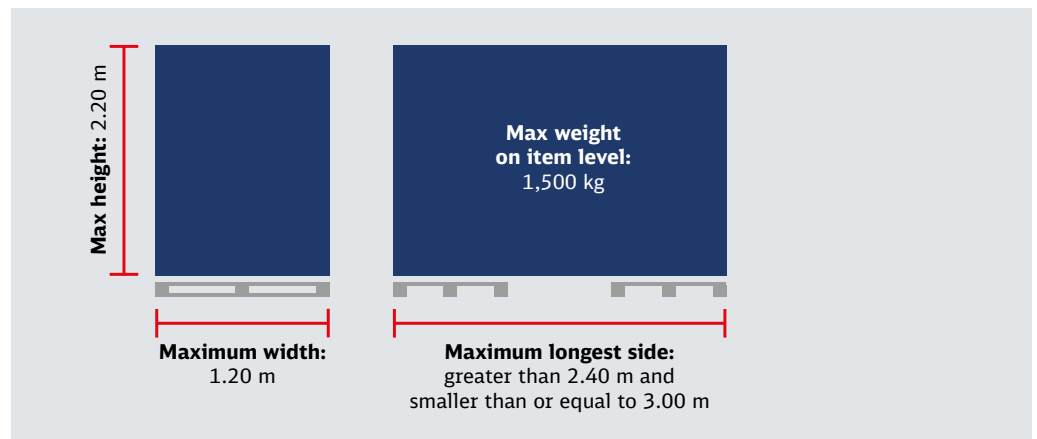

i When booking long goods please do consider that **exact transportation times can not be guaranteed** for this kind of freight.

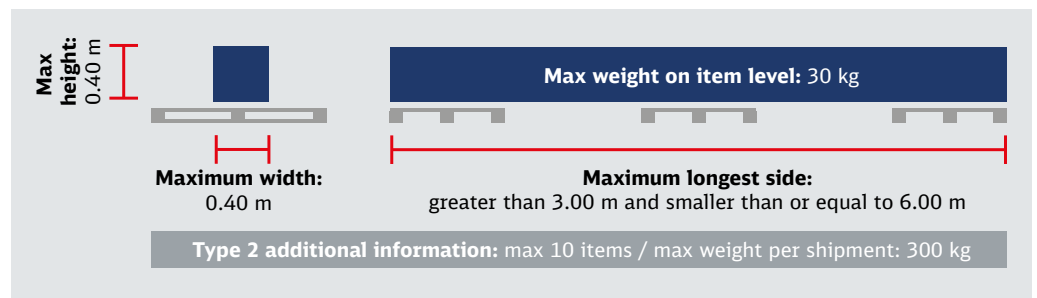

Specifications: Long goods Type 1 & Type 2

We divide long goods into two distinctive classes. Type 1 is suitable for heavier weights, while Type 2 is perfect for lighter goods with a longer length.

Long goods Type 1 – from 2.40 m to 3.00 m

Long goods Type 2 – from 3.00 m to 6.00 m
