

DB SCHENKER | eurasia

Connecting China with Europe by rail

Rail transports are ideal when a faster transport time compared to sea freight is required and the most suitable transport unit for the consignment is a container.

DB SCHENKER | eurasia freight solutions are perfect for single containers (FCL) and less-than-container loads (LCL), that require customization e.g. due to high weight or volume. We combine different modes of transport and offer logistics solutions tailored to your individual needs – environmentally friendly.

- A comprehensive network covering the whole of Finland, Europe and China
- Reliable and environmental friendly solution
- High benefit ratio
- Continuous and regular scheduled from door to door service

There are several routes and departures, together we will find an alternative that suits your needs. You will receive delivery time estimates and departure schedules are available with the offer.

The order channel for **DB SCHENKER | eurasia** services is always agreed on case-by-case basis to meet customer needs. Our certified quality, environment and security policy and AEO F status from the Finnish Customs underline the reliability of our partnership.

DB SCHENKER | eurasia services are provided according to current freight rates, service fees and the General Terms and Conditions. The relevant information is available via **DB SCHENKER | connect** online service or your contact person. Below you will find an overview of the key features of the service

Transportation order and value added services

Place your transportation order no later than 7 working days before the departure of the train. Inform us the actual weight, volume and loading meters of your consignment, so that we can plan the transport. You may supplement your transportation order e.g. with value added services such as export and import declarations and delivery according to agreed time or date.

The transportation of dangerous or classified goods is generally prohibited. However, there are product-specific exceptions on different routes, and we always explore opportunities on a case-by-case basis.

Pricing

Pricing is based on the size, time of delivery and routing of the shipment. For each request for quotation, you will receive your own customized door-to-door quote, which also includes scheduling and routing options.

Consignment size

The consignment can be from one pallet to a full load shipment. The maximum weight of the shipment is 23 tons, and a single package shall not exceed a maximum weight of three tonnes. Shipment must be packed and suitable for mechanical handling. DB Schenker reserves the right to reload the consignment during transport from one transport unit to another.

Transport documents

You will have the transportation documents needed for your shipment in connection with your order. Authorities may also require other transportation documents depending on the type of product and traffic direction. We handle import and export declarations as an additional service.

Pick-up

We will pick up shipments according to the agreed schedule. The pick-up location must be manned at the agreed pick-up time. The consignor must load part and full load shipments using their own equipment.

Delivery

The delivery is made according to the agreed schedule. Shipments are only handed over to the consignee indicated in the order. The consignee unloads the shipment using their own equipment.

Equipment

We transport your shipment door to door. The line haul transport is handled with 40' HC containers. In collection and distribution traffic, we utilize our terminal and distribution network both in China and in Europe (e.g. **DB SCHENKER | system**). For full container shipments (FCL), we will pick up and/or distribute the shipment without transshipment, if we so agree.

By separate agreement, we also arrange temperature-controlled solutions. For monitoring services there are several different solutions.

All services under one roof

We provide comprehensive solutions, from transportation to warehousing and value added services. With our help, you can reach your customers easily in Finland and abroad.

Check-list for smooth transportation

1. Place your transportation order no later than 7 working days before the departure of the train. Inform us the actual weight, volume and loading meters of your consignment.
2. Inform us already when ordering, from where and when the shipment should be picked-up and when the shipment should arrive.
3. Make sure, that your shipment is suitable for mechanical handling.
